Catalan; Valencian

Otters, penguins, video games, football (soccer), Japan/Korea, paddle.

A youngster with a great passion for functional programming and data science. I love to do personal projects and upload them to my GitHub.

- Formed and certified as AWS Cloud Practitioner.
- Worked in an app debugging frontend/backend and deploying infrastructure with CDK.

- Worked with micro-service management in virtual machines.
- Developed a project to automate video file tests with custom user config (C#, .NET) that allowed the staff to save time when trying new versions of Nablet.

- OOP (Java/C#, Netbeans/IntelliJ/Visual Studio).
- Database design/creation (MSSQL).
- ERPs & CRMs.

A view-less library to control/validate matches of The Game of the Amazons. Functionally pure & free from unintended side effects. It got accepted into the official package set of the PureScript language.
